

The Institution of Railway Signal Engineers Singaporean Section

Victoria and Sub Surface Lines Signalling Renewal

Presented by
Dr. Daniel Woodland CEng MIRSE MIEE
Senior Line Upgrade Engineer
London Underground Limited

For the last three years Daniel has been LUL'S signalling asset manager for the changes to the Sub Surface Lines (SSL). Daniel is also a member of the IRSE Council

Abstract

Building on Daniel's presentation in May 2006 on 'London Underground's Signalling Renewal', this latest presentation will pull together a more detailed look at the Westinghouse DTG-R system currently being implemented on the SSL and parallel Victoria Line upgrade. The presentation will highlight the progress and contractual (Public Private Partnership)/ engineering issues encountered by the projects to date.
